Kitchens

Mini Brochure

Marvellous Mud!

Get messy outdoors, with our interactive guide which aims to show the benefits of playing with mud. Not only is this a fun activity for your little ones but it helps their cognitive and physical development. In this guide, you will uncover Newby Leisure's natural mud kitchens, carefully designed and manufactured for your child's development.

"Newby Leisure are and will always be our preferred suppliers. You tick all the boxes for us. The quality of materials, the workmanship and the first class team are just the ticket. With us there's a project every year if we can afford it. The sketches always help us visualise the end result, but Newby Leisure has never failed to make the end project look soo much better than the sketch.

The Benefits of mud play!

Wooden Workbench
NLCOM-196

PHYSICAL DEVELOPMENT

Mud kitchens are designed to get children involved with picking up a range of utensils and objects. By participating in this activity children naturally build their fine motor skills.

LITERACY SKILLS

Our mud kitchens are designed to engage children in literacy activities such as, reading and writing down their favourite recipes.

ROLE-PLAY

Mud kitchens encourage children to role-play adults - mimicking their mum and dads cooking tea!

UNDERSTANDING THE OUTDOOR ENVIRONMENT

Mud kitchens are fun, whatever the weather! Children learn that mud changes depending on the season - mud in all its glory, melting, drying and freezing.

COOPERATIVE PLAY

Mud kitchens encourage children to play together where they build skills in negotiation and teamwork.

COMMUNICATION

Playing with mud has many benefits. Children learn new vocabulary whilst they play - "scooping, mixing, crushing and squashing".

PROBLEM SOLVING

Problem-solving is prevalent whilst children are playing with mud. For example, they try to understand how to change the consistency of the mud and how to mix it with other ingredients to form a recipe.
